2934 West Northview Avenue  
Phoenix, AZ 85051  
(602) 881-3305

Don't Waste Arizona, Inc. (DWAZ) has helped many people and worked on many different issues and areas of the state, from landfills to refineries, steel mills, and chemical fire disasters to reducing levels of hazardous chemical emissions and environmental risks in our communities. DWAZ has realized that most people need technical, legal, and practical assistance when there is an environmental justice problem in our communities, whether it is an old problem or a proposed new facility. DWAZ realizes that unless we organize to push our government to protect us and our environment, there is certainly no one in government or industry who will. When necessary, DWAZ will even enforce environmental laws on behalf of its members using the citizen suit provision of federal environmental laws. We are the most successful citizen suit enforcement group west of the Mississippi River, and have returned over \$1.6 million to the U.S. Treasury through our enforcement activities.

If you need help with chemical hazards in or proposed for your community, who else can you call for help or suggestions? DWAZ works to protect all Arizonans against toxic pollution of our air, water, and land, destruction of our resources, environmental racism, and government cover-ups. DWAZ also works for renewable energy, safe, clean jobs, environmental justice, and economic sustainability. To become a member, complete the following:
